

Why is the U.S. COVID death toll higher than most nations?

I. The United States COVID (excess) death rate is in the top 10% highest in the world

as of June 14, 2020	Percent Deaths per confirmed COVID19 Cases	Deaths per Million persons	Number of FEWER U.S. persons who would have died if the U.S. health care system & practices were as effective as in these countries.
United States	5.48%	355.2	
Germany	4.73%	105.8	82,532
Iran	4.71%	105.2	82,737
Philippines	4.20%	9.9	114,272
Bangladesh	3.59%	19.1	111,246
Egypt	3.45%	14.5	112,759
India	2.85%	6.7	115,340
Turkey	2.71%	56.8	98,753
Nigeria	2.60%	2.0	116,905
DR Congo	2.24%	1.2	117,163
Pakistan	1.89%	11.9	113,614
Ethiopia	1.70%	0.5	117,394
Russia	1.31%	47.6	101,801

Above are some larger nations with lower COVID deaths than the United States out of both their number of confirmed cases and out of each million persons in their populations. Thus, COVID-19 deaths in the United States would have been at minimum 82.5 K fewer if the United States had a health care system at least as good as any of the above countries. For instance, if the United States' health care system were as effective as Turkey's, the United States would have had 98.7 K fewer COVID19 deaths as of June 14, 2020. II. Why other nations' COVID & excess death rates are lower than the United States

A. Other nations used inexpensive early stage cures, avoiding serious cases hospitalizations and deaths

India, Turkey, Pakistan, the Philippines, and Russia used hydroxychloroquine among other treatments. In Africa (DR Congo, Ethiopia, and Nigeria) hydroxychloroquine is over-the-counter.

SAFE THERAPEUTIC TREATMENT (India): Currently, as per protocols set by the Indian government to treat severe coronavirus patients requiring ICU management, HCQ dosages are administered in the following way- 1st day a heavy dose of 400mg HCQ dose once in the morning and one at night, followed by 200 mg HCQ one in the morning and one at night to be followed for the next four days. The total dosage administered to a patient in 5 days, therefore, amounts to 2400 mg.

Chief doctor Nurettin Yiyit ... - says it's key to use hydroxychloroquine early. "Other countries are using this drug too late," he says, "especially the United States. We only use it at the beginning. We have no hesitation about this drug. We believe it's effective because we get the results." ... Turkey's approach is to "get ahead of the virus", by treating early and treating aggressively.

B. Other poorer nations did not use invasive harmful ventilators to oxygenate patients.

C. Some other nations lacked 5 G microwave wireless cellular and wireless networks that spin oxygen molecules and exacerbate any disease causing oxygen failure like COVID-19

III. Systemic U.S. health care failures cause high rate of excess deaths during COVID19?

A. Medicare pays hospitals much more for COVID19 designations and ventilator usage

B. Pharmaceutical companies have captured United States federal and international agencies tasked with overseeing United States health care systems. Drug companies have captured not only U.S. federal agencies and international agencies like the World Health Organization (WHO). Pharmaceutical companies hoping to sell vaccines and more

expensive newer drugs, with funding or assistance from Bill & Melinda Gates Foundation, the World Health Organization, and Dr. Fauci have funded "safety" studies giving 2 to 6 or 7 times the known safe therapeutic dosages in inhumane human trials of hydroxychloroquine designed to show this inexpensive, 70 year old drug that has been safely used for generations, is "too dangerous" to use for COVID-19 patients. The studies also failed to provide zinc to patients, which works in tandem with hydroxychloroquine. Most of these inhumane human trials also failed to test safe dosages of hydroxychloroquine in early stage cases

- C. **Initial testing in the United States had too-long turnaround times** during which an early stage, easily treatable case could turn into a serious moderate or severe case before the test results came back.
- D. **U.S. media has been captured by pharmaceutical advertising dollars** and is only presenting one-sided misinformation about COVID-19.
- E. **U.S. social media (facebook and youtube) has been censoring expert opinions** and data that do not conform to the WHO and Dr. Fauci narratives.
- F. **U.S. politicians have been captured by big pharmaceutical campaign contributions** due to the Citizens United ruling by the United States Supreme Court. Governors were misled by these drug companies and biased media sources and enacted measures to make it difficult for drug stores to furnish and for doctors to prescribe, early stage, inexpensive COVID-19 cures.
- G. **The Vaccine agenda.** Dangerous vaccine trials were falsely claimed to be successful and young children, who have virtually no danger of getting serious COVID-19 cases are being used as guinea pigs for vaccine trials.

- F. **Known, inexpensive early stage cures are *not* being used in the United States** because Dr. Fauci, Bill & Melinda Gates Foundation, WHO, & pharmaceutical companies' waged a propaganda war against life-saving hydroxychloroquine & zinc and manipulated studies to make Remdesivir look effective. For example, Bill and Melinda Gates Foundation funded WHO studies that gave dangerously high, potentially lethal dosages of four to seven times the safe and effective level of hydroxychloroquine and chloroquine. Dr. Fauci federally stock-piled supplies of hydroxychloroquine imported from other countries and refused to release it for early stage COVID treatment.

- H. Lack of public education in susceptibilities, proper levels/dosages of vitamins and minerals D, zinc, vitamin C, etc. and many other issues related to COVID19.

For all of the above reasons, the United States health care system has produced over 82,000 unnecessary COVID19 deaths as of June 14, 2020, plus unnecessary lockdown policy deaths.
